Mercedes-AMG GT now available to order as Coupé and Roadster

Sales start for the new Performance models

Affalterbach. With the extensively enhanced AMG GT as Coupé (combined fuel consumption: 13.0 l/100 km; combined CO₂ emissions: 297 g/km)¹ and Roadster (combined fuel consumption: 12.9 l/100 km; combined CO₂ emissions: 296 g/km)¹, Mercedes-AMG is making it even more attractive to enter the brand's sports car world: both now have an output of 390 kW (530 hp), some 40 kW (54 hp) more than previously. The standard equipment on board now includes the AMG RIDE CONTROL suspension with adaptive damping adjustment, the electronic locking differential on the rear axle, the AMG high-performance composite braking system and brake callipers painted in red. Additional plus points include the lithium-ion starter battery and the "RACE" drive program. As an option in conjunction with the AMG DYNAMIC PLUS Package, it is also possible to order active rear axle steering. The new AMG GT models are available to order now at a starting price from 119,079.80² euros for the Coupé and 130,679.80² euros for the Roadster. They will arrive at the dealerships in November 2020.

The "Night Edition" also becomes available for both AMG GT variants. It comprises the AMG Exterior Night Package, black brake callipers, AMG radiator grille in dark chrome, main headlamps with black elements, and mixed-size tyres with 19-inch matt black Y-spoke wheels on the front plus 20-inch wheels on the rear. Other features of the "Night Edition" include the carbon-fibre roof with dark-tinted areas on the Coupé and the black soft top on the Roadster. The choice of paint finishes includes black as standard plus obsidian black metallic, selenite grey metallic or designo graphite grey magno as options.

The interior of the "Night Edition" also features a sporty, exclusive look. Equipment includes AMG Performance seats, AMG Interior Night Package, AMG steering wheel in DINAMICA microfibre with black steering wheel spokes and shift paddles, upholstery in Exclusive nappa STYLE leather in black with diamond quilting and black topstitching plus trim elements in black piano lacquer (optionally in carbon fibre/black piano lacquer). A badge in the centre console makes reference to the special model. The introduction of the enhanced AMG GT models sees the discontinuation of the Coupé and Roadster variants of the AMG GT S.

¹ The stated figures are the measured "NEDC CO₂ figures" in accordance with Art. 2 No. 1 Implementing Regulation (EU) 2017/1153. The fuel consumption figures were calculated based on these figures. A higher figure may apply as the basis for calculating the motor vehicle tax. Further information on the vehicles on offer, including the WLTP values, can be found for each country at www.mercedes-benz.com

Mercedes-Benz AG at a glance

Mercedes-Benz AG is responsible for the global business of Mercedes-Benz Cars and Mercedes-Benz Vans, with 173,000 employees worldwide. Ola Källenius is Chairman of the Board of Management of Mercedes-Benz AG. The company focuses on the development, production and sales of passenger cars, vans and services. Furthermore, with its pioneering innovations, the company aspires to be a leader in the fields of connectivity, automated driving and alternative powertrains. The product portfolio comprises the Mercedes-Benz brand with the sub-brands Mercedes-AMG, Mercedes-Maybach and Mercedes me, as well as the smart brand and the EQ product and technology brand for electric mobility. Mercedes-Benz AG is one of the largest manufacturers of premium passenger cars. In 2019, it sold nearly 2.4 million passenger cars and more than 438,000 vans. In its two business segments, Mercedes-Benz AG is continually expanding its worldwide production network with over 40 production sites on four continents, while gearing itself to meet the requirements of electric mobility. At the same time, the company is constructing its global battery production network on three continents. Sustainable actions play a decisive role in both business segments. To the company, sustainability means creating lasting value for all stakeholders: customers, employees, investors, business partners and society as a whole. The basis for this is Daimler's sustainable business strategy. In this, the company takes responsibility for the economic, ecological and social effects of its business activities and looks at the entire value chain.
